Materials - specifications

- Metalwork Units and Construction: our metalwork is made from heavy-gauge aluminium and has a marine-grade textural powder coating for protection from the elements. Colour: RAL9005
- Work surfaces: our worksurfaces are made from Grillo Plateau™ sintered stone. In addition to being immensely strong, it offers UV stability, heat resistance, stain/chemical resistance, scratch resistance, porosity and weatherproofing. Its durability is attributed to fusing minerals under extreme heat and pressure, in a process that emulates natural metamorphic rock formation. Worktop colour: Smoke
- Fixings: all supplied fixings are stainless steel 304 or above.

For more information see our design and materials page: https://grilloliving.com/element-materials/

CAD files

- SKP and DWG files available for download or on request
