

SERVICES FOR MAINS GAS SIDEBURNER, UK

MAINS GAS BBQS WITH A **SIDEBURNER** HAVE **TWO** HOSES TO CONNECT

If your mains gas BBQ has a sideburner, it will be provided with **two** mains gas connection kits. Your certified gas engineer will need to provide sufficient supply for both, and connect them to the BBQ/sideburner and to the mains.

Note: The gas hoses **will not** be connected to the BBQ by the installers as this needs to be completed by a **Certified Gas Engineer**. The yellow gas pipe kits will be supplied by us for the gas engineer to connect.

MAINS GAS CONNECTION KIT (1 OF 2)
