

WHAT IS THE PROCESS?

Your electrician:
Runs cables to location and
installs external socket

Grillo install team:
Install your outdoor
kitchen units

Your electrician:
Installs kitchen-
mounted socket if reqd.

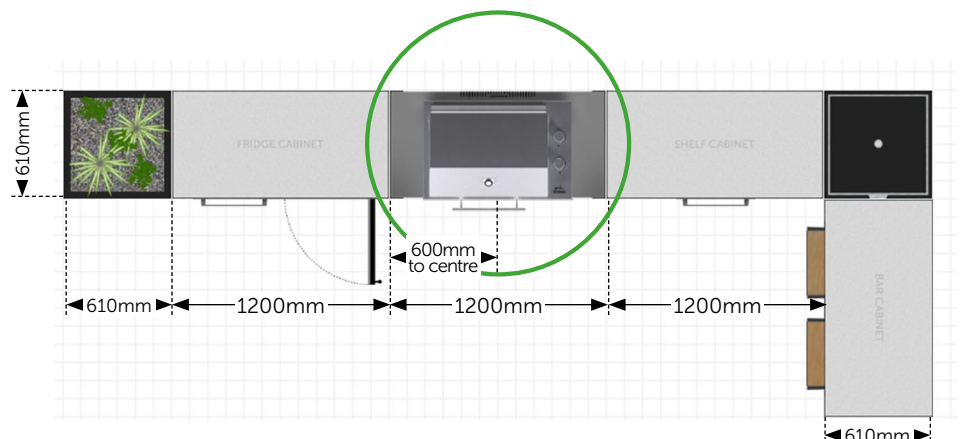

WHAT DO GRILLO SUPPLY?

ELECTRICS POSITIONING

Example install diagram:

Large units are 1200 x 610mm.
Small units are 610 x 610mm.

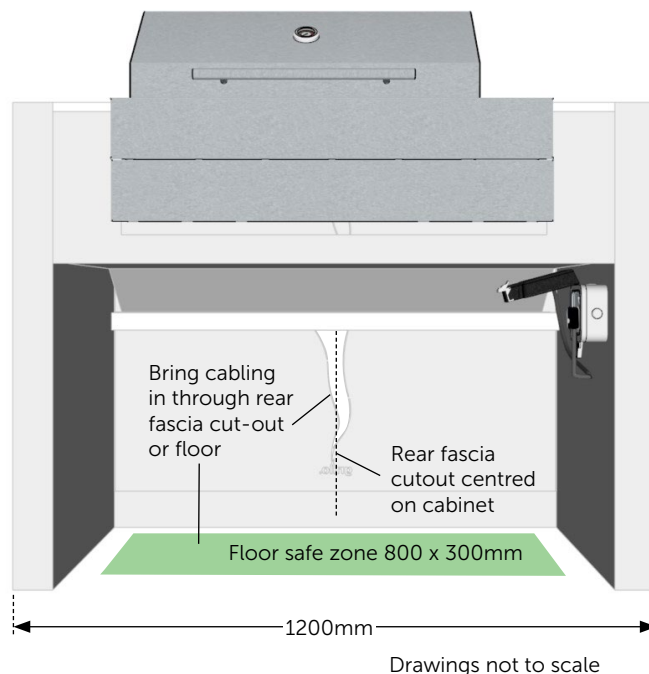

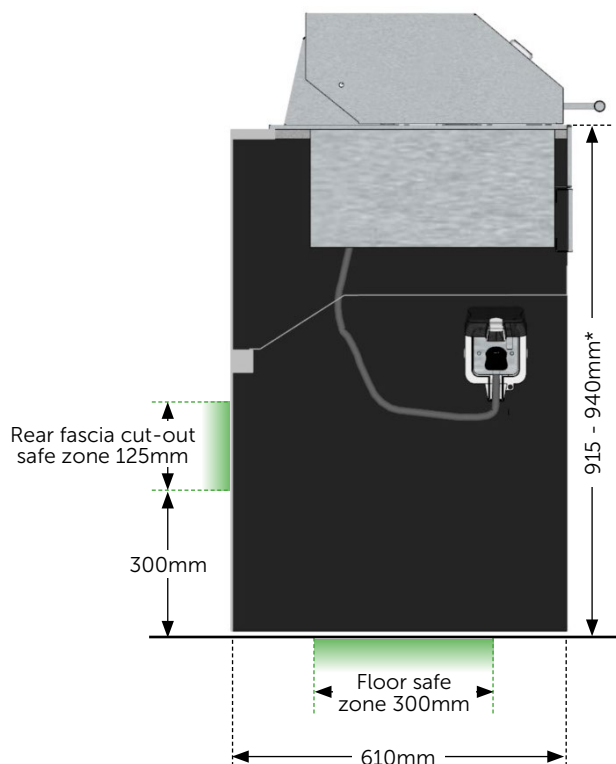

SERVICES ROUTING OPTIONS - NOTE THAT VOLTIQ REQUIRES A 13A SUPPLY

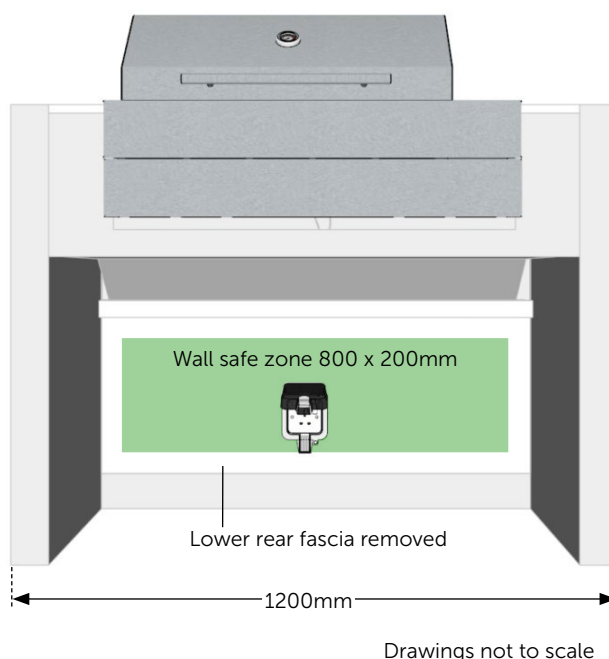

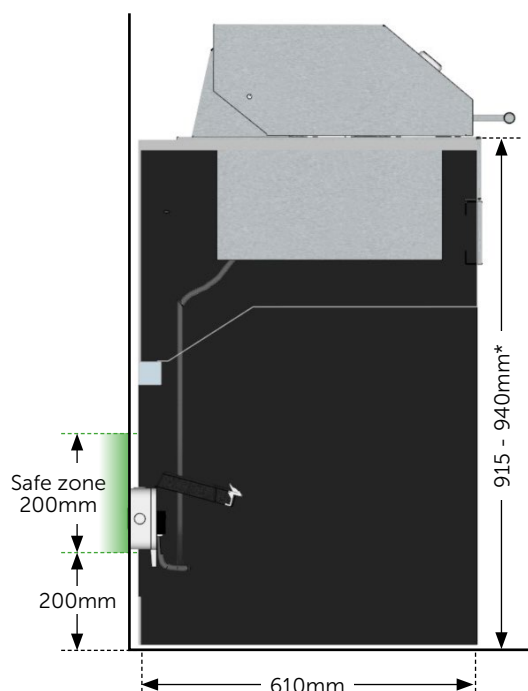

Option 1

Mount the 13A outdoor socket inside the cabinet. Run the cable into the unit through the floor or by removing the cut-out in the rear fascia.

Option 2

If the kitchen is going up against a wall, you can remove the lower rear fascia panel, and mount the 13A outdoor socket directly on the wall. We recommend only doing this where the back the unit will be visible.

*The height variation is for adjustment in the cabinet feet.

Option 3

The Voltiq power cable is 4.5m in length. This allows you to run the cable outside the kitchen layout to a 13A socket within reach.
